Subject: Management objectives

Tony,
Franklin has indicated that we can send these on to Karen. We need to build an IAP somehow. I am certain the Colonial is doing them. We need to find out if Karen is in the approval chain.

Colonial Pipeline Incident

Management Objectives: November 1, 2016

- Protect the health and safety of all response personnel;
- Fully integrate with federal, state, local, tribal and private response structures as appropriate;
- Ensure sufficient resources are on-hand to manage the incident including information gathering and documentation, health and safety, and response oversight.
- Establish communication and briefing schedules with R4 management;
- Provide up to date situational awareness to Regional management and External Affairs through situation reports and verbal briefings per the established briefing/communication schedule;
- Ensure control and containment of any discharge of oil to protect responders, the public and the environment; and
- Perform independent environmental monitoring and sampling and report results;

James W. Webster, Ph.D., Chief
Emergency Response, Removal and Prevention Branch
Superfund Division
U.S. Environmental Protection Agency, Region 4
